The screenshot shows the homepage of the journal "Data & Knowledge Engineering" (DKE) on the Elsevier website. The browser address bar shows the URL "https://www.journals.elsevier.com/data-and-knowledge-engineering". The page features the Elsevier logo, a search bar, and a menu. The journal's cover image is displayed on the left, with the ISSN "0169-023X". A sidebar on the left contains links: "Submit Your Paper", "Supports Open Access", "View Articles", "Guide for Authors", "Abstracting/ Indexing", and "Track Your Paper". The main content area includes the journal title, Editor-in-Chief "P.P. Chen", and a link to "View Editorial Board". A paragraph describes the journal's focus on database and knowledgebase systems. Below this, there are links to "Most Downloaded", "Recent Articles", "Most Cited", and "Open Access Articles". Three article titles are listed: "ST-DBSCAN: An algorithm for clustering spatial-temporal data" by Denya Birant | Alp Kut, "Big data technologies and Management: What conceptual modeling can do" by Veda C. Storey | Il-Yeol Song, and "From humor recognition to irony detection: The figurative language of social". A vertical "Feedback" button is on the right. The Windows taskbar at the bottom shows the date "6.12.2018" and time "11:37".

Message from the Guest Editors

Dear Colleagues,

Two of the main challenges facing humanity are the care of the environment and the reduction of growing inequality. After the relative success of the Millennium Development Goals (MDG), the Sustainable Development Goals (SDG) proposed by United Nations constitute an agenda for the period between 2015 and 2030. Without doubt, education was a leverage factor in the achievement of the Millennium Development Goals, and today is a key factor for compliance with the SDGs.

This Special Issue aims to analyze educational experiences in the field of sustainability in engineering and technology education at different educational levels, from primary education to university levels. It is open to formal and informal education initiatives, to the development of courses on sustainability or to the development of competence across the curriculum. Theoretical reflections that address the relationship between engineering and technology education and sustainability are also welcome.

Dr. Francisco Zamora-Polo

Dr. Jesús Sánchez Martín

15 June 2007

Abstract

This paper is a survey of a large number of informal definitions of “intelligence” that the authors have collected over the years. Naturally, compiling a complete list would be impossible as many definitions of intelligence are buried deep inside articles and books. Nevertheless, the 70-odd definitions presented here are, to the authors’ knowledge, the largest and most well referenced collection there is.

Contents

| | | |
|----------|---|----------|
| 1 | Introduction | 2 |
| 2 | Collective definitions | 2 |
| 3 | Psychologist definitions | 4 |
| 4 | AI researcher definitions | 7 |
| 5 | Is a single definition possible? | 9 |
| | References | 9 |

Keywords

Intelligence definitions, collective, psychologist, artificial, universal.

IJLT is an international, refereed, scholarly journal providing an interdisciplinary forum for the presentation and discussion of important ideas, concepts, and exemplars that can deeply influence the role of learning technologies in learning and instruction. This unique and dynamic journal focuses on the epistemological thrust of learning vis-à-vis instruction and the technologies and tools that support the process. *IJLT* publishes papers related to theoretical foundations, design and implementation, and effectiveness and impact issues related to learning technologies.

About this journal

Editorial Board

Submitting articles

Topics covered include

- Communities of learners (practice), computer-mediated communication
- [Social] constructivism, computer-supported collaborative learning
- Cognitive tools, intelligent agents, semantic web
- Distributed/intelligent learning/tutoring, multimedia/interactive learning environments
- Virtual reality environments, human-computer interface issues
- Learning objects for personalised learning, building learning communities
- Technology-facilitated learning in complex domains
- Learning technology systems' evaluation, technological standardisation
- Simulation-supported learning/instruction
- Learning technology in education and commerce
- Disciplinary-related inquiry, e.g., learning technologies for science inquiry
- MOOCs, social media and cloud computing in e-learning
- Data analytics and big data in education
- E-learning evaluation and content; e-portfolios
- Smart education; internet of things/technology adoption and diffusion for learning

Can big data go mainstream? In 1999, the advent of blogging gave birth to what we've all come to know as the Web 2.0. From consumers of content generated by a very limited number of sources, internet users had become the creators of this content. The amount of information available ballooned, and suddenly everyone was given a platform large enough to become an influencer. It didn't take long before businesses and ICT experts realised that the amount of data generated online, although almost impo...

International Journal of Intelligent Robotics and Applications

Editor-in-Chief: Kok-Meng Lee

Co-Editors-in-Chief: H. Liu; Z. Yin

- Launched in 2017
- Covers all aspects of robotics, including automation, mechatronics, robotic design and manufacturing
- Devotes special attention to the novel and emerging applications of robotics
- Integrates theories and technologies from computer science, mechanical engineering, electrical and electronic engineering
- Rapid review and publication of articles

Instructional Science

An International Journal of the Learning Sciences

ISSN: 0020-4277 (Print) 1573-1952 (Online)

Description

Instructional Science, An International Journal of the Learning Sciences promotes a deeper understanding of the nature, theory, and practice of learning and of environments in which learning occurs. Published papers represent a variety of perspectives from the learning sciences and cover learning by people of all ages, in all areas of the curriculum, in technologically rich or lean environments and in informal and formal learning environments. Things in common in learning communities

The screenshot shows the website for the Journal of Information Science, published by CILIP. The header includes the journal title, CILIP logo, and an impact factor of 1.372. The main content area features an article titled "Knowledge, information, and information science" by J. Farradane, published in April 1, 1980. The abstract discusses the scope of information science and the processes of thinking, memory, and knowledge. The keywords listed are "Thought, knowledge, memory, information, information retrieval, Information science, communication, theory". A list of references is provided, including works by J. Farradane, J. Farradane and P. Gulutzan, and B. Belkin, H.M. Brooks and R.N. Oddy. The right sidebar contains links for "Table of Contents", "Article Metrics", "Related Articles", "Cite", "Permissions", "Share", and "Download PDF". The bottom of the page shows a Windows taskbar with various application icons and a system clock indicating 17:32 on 31.12.2017.

Cognition, Technology & Work

ISSN: 1435-5558 (Print) 1435-5566 (Online)

Description

Focus: Cognition, Technology & Work focuses on the practical issues of human interaction with technology within the context of work and, in particular, how human cognition affects, and is affected by, work and working conditions.

The aim is to publish research that normally resides on the borderline between people, technology, and organisations. Including how people use information technology, how experience and expertise dev ... [show all](#)

Cognition, Technology & Work

ISSN: 1435-5558 (Print) 1435-5566 (Online)

Description

Focus: Cognition, Technology & Work focuses on the practical issues of human interaction with technology within the context of work and, in particular, how human cognition affects, and is affected by, work and working conditions.

The aim is to publish research that normally resides on the borderline between people, technology, and organisations. Including how people use information technology, how experience and expertise dev ... [show all](#)

Tanveer Ahmed, Abhishek Srivastava (August 2018)

Od: IJACSA <editorijacsa@thesai.org>
Predmet: Scopus - International Journal of Advanced Computer Science and Applications (IJACSA)
Datum: Str. 25. Juli 2018 11:12:27
Komu: <stefan.svetsky@stuba.sk>

We are pleased to announce that International Journal of Advanced Computer Science and Applications (IJACSA) has been accepted for inclusion in Scopus. Coverage in Scopus will start from 2018.

Scopus is the largest abstract and citation database of peer-reviewed literature: scientific journals, books and conference proceedings. Delivering a comprehensive overview of the world's research output in the fields of science, technology, medicine, social sciences, and arts and humanities, Scopus features smart tools to track, analyze and visualize research. Scopus is considered the Gold Standard for research assessment and evaluation purposes by 4,500+ universities and 150+ leading research organizations worldwide.

We are always grateful for the work of our editors and reviewers in building this journal, and the caliber of research that has been submitted. In just a few short years we have built a strong community including some of the top-scientists in the field. Since its launch, the journal has offered a dynamic open-access model to the computer science research community, publishing 4200+ articles so far. As of July 2018, the journal has had over 10 million article views.

Thank you for being a part of this ecstatic journey!

IJACSA Call for Papers is currently open

Unique attributes

Information Technology & People has a longstanding reputation for publishing up to date, interesting, relevant and provocative research which opens up new directions for academic research. It is a source for emerging ideas which broadens the understanding of information technology and its relation to people. The journal retains an openness to multiple paradigms of research including most forms of mainstream empirical work. It has an ongoing tradition of being an outlet for international, qualitative and critical research in information systems and particularly welcomes cultural and geographic diversity in studies and old technologies. It looks for ways to better understand how people collectively conceptualize, invent, adapt, define, technology, as well as how they are constrained by features of it.

Kybernetes is the official journal of the UNESCO recognized World Organisation of Systems and Cybernetics (WOSC), and The Cybernetics Society.

The journal is an important forum for the exchange of knowledge and information among all those who are interested in cybernetics and systems thinking.

It is devoted to improvement in the understanding of human, social, organizational, technological and sustainable aspects of society and their interdependencies. It encourages consideration of a range of theories, methodologies and approaches, and their transdisciplinary links. The spirit of the journal comes from Norbert Wiener's understanding of cybernetics as "The Human Use of Human Beings." Hence, Kybernetes strives for examination and analysis, based on a systemic frame of reference, of burning issues of ecosystems, society, organizations, businesses and human behavior.

The journal addresses current areas of concern and debate whilst promoting future perspectives and developments. The complex

It is well known that every animal species obeys Darwin's law of evolution, which requires permanent adaptation of animals to their environment. To be precise, every species except man, who behaves exactly contrariwise, adapting the workplace to himself in order to survive. For that he generally enjoys a particular gift of nature: intelligence.

That reverse adaptation, which accumulated over centuries, led to what we call "progress". This was enhanced

About

Aims and scope

The *International Journal of STEM Education* is a multidisciplinary journal in subject-content education that focuses on the study of teaching and learning in science, technology, engineering, and mathematics (STEM). It is being established as a brand new, forward looking journal in the field of education. As a peer-reviewed journal, it is positioned to promote research and educational development in the rapidly evolving field of STEM education around the world.

JOCCH Journal on Computing and Cultural Heritage (JOCCH)

ACM Journal on Computing and Cultural Heritage (JOCCH) publishes papers of significant and lasting value in all areas relating to the use of ICT in support of Cultural Heritage, including (but not limited to) the following areas:

- On-site and remotely sensed data collection
- Metadata, classification schema, ontologies and semantic processing
- Analytic tools to assist research on collections or artefacts
- Digital artefact capture, representation and manipulation
- ICT assistance in monitoring and restoration
- Intelligent tools for digital reconstruction
- Long term preservation of digital artefacts
- Provenance, copyright and IPR
- Story-telling and other forms of communication
- Digital capture and annotation of intangible heritage (performance, audio, dance, oral heritage)
- ICT technologies in support of creating new cultural experiences or digital artefacts
- Augmentation of physical collections with digital presentations
- Applications (e.g. in Education and Tourism)

JOCCH seeks to combine the best of computing science with real attention to any aspect of the cultural heritage sector.

Abstract

The purpose of this article is to offer some reflections on the relationships between digital technologies and learning. It is argued that activities of learning, as they have been practised within institutionalized schooling, are coming under increasing pressure from the developments of digital technologies and the capacities to store, access and manipulate information that such resources offer. Thus, the technologies do not merely support learning; they transform how we learn and how we come to interpret learning. The metaphors of learning currently emerging as relevant in the new media ecology emphasize the transformational and performative nature of such activities, and of knowing in general. These developments make the hybrid nature of human knowing and

ComputingEdge - April 2018 Issue

Change is in the Air

Now that springtime is here, we're turning over a new leaf—or petal, perhaps?—and shaking things up a bit here at *ComputingEdge*. Starting with this issue, instead of highlighting one theme per month, we'll be featuring as many as five themes per issue to bring our readers a broader sampling of the cutting-edge research from all 13 Computer Society magazines. In this issue, you'll read about the latest in the **Internet of Things (IoT), blockchain, healthcare, social media, and security.**

[Access the April issue HERE](#) Enjoy!

NEW TECHNOLOGY, WORK AND EMPLOYMENT

HOME | ABOUT | CONTRIBUTE | BROWSE

Overview

Aims and Scope

New Technology, Work and Employment presents analysis of the changing contours of technological and organisational systems and processes in order to encourage an enhanced and critical understanding of the dimensions of technological change in the workplace and in employment more generally. The journal is eclectic and invites contributions from across the social sciences, with the primary focus on critical and non-managerial approaches to the subject. It has the aim of publishing papers from perspectives concerned with the changing nature of new technology and workplace and employment relations. The objective of the journal is to promote deeper understanding through conceptual debate firmly rooted in analysis of current practices and sociotechnical change.

Special Issue: Registered Reports in Computer Assisted Learning - Submission Deadline for Stage 1 Manuscripts : 1st August 2018

We invite the submission of Stage 1 manuscripts in the format of Registered Reports. This special issue does not have a strong focus on any particular topic within the field of computer assisted learning. All topics which fall within the scope of JCAL will be considered for this special issue, conditional that the suggested studies follow all the requirements of being a Registered Report. More information can be found [here](#).

International Journal of Emerging Technologies in Learning (iJET)

This interdisciplinary journal aims to focus on the exchange of relevant trends and research results as well as the presentation of practical experiences gained while developing and testing elements of technology enhanced learning. So it aims to bridge the gap between pure academic research journals and more practical publications. So it covers the full range from research, application development to experience reports and product descriptions.

IJET is an Open Access Journal. Readers don't have to pay any fee.

Don't miss out on this new journal

International Journal of Intelligent Robotics and Applications

Editor-in-Chief: Kok-Meng Lee

Co-Editors-in-Chief: H. Liu; Z. Yin

- Launched in 2017
- Covers all aspects of robotics, including automation, mechatronics, robotic design and manufacturing
- Devotes special attention to the novel and emerging applications of robotics
- Integrates theories and technologies from computer science, mechanical engineering, electrical and electronic engineering
- Rapid review and publication of articles

Enjoy free access to all articles
