

Konsortium V4+ACARDC

V4 Educational Academic Portal for Integrating IT into Education (V4-EDUPORT)

V4 EDUPORT Project outputs 2022

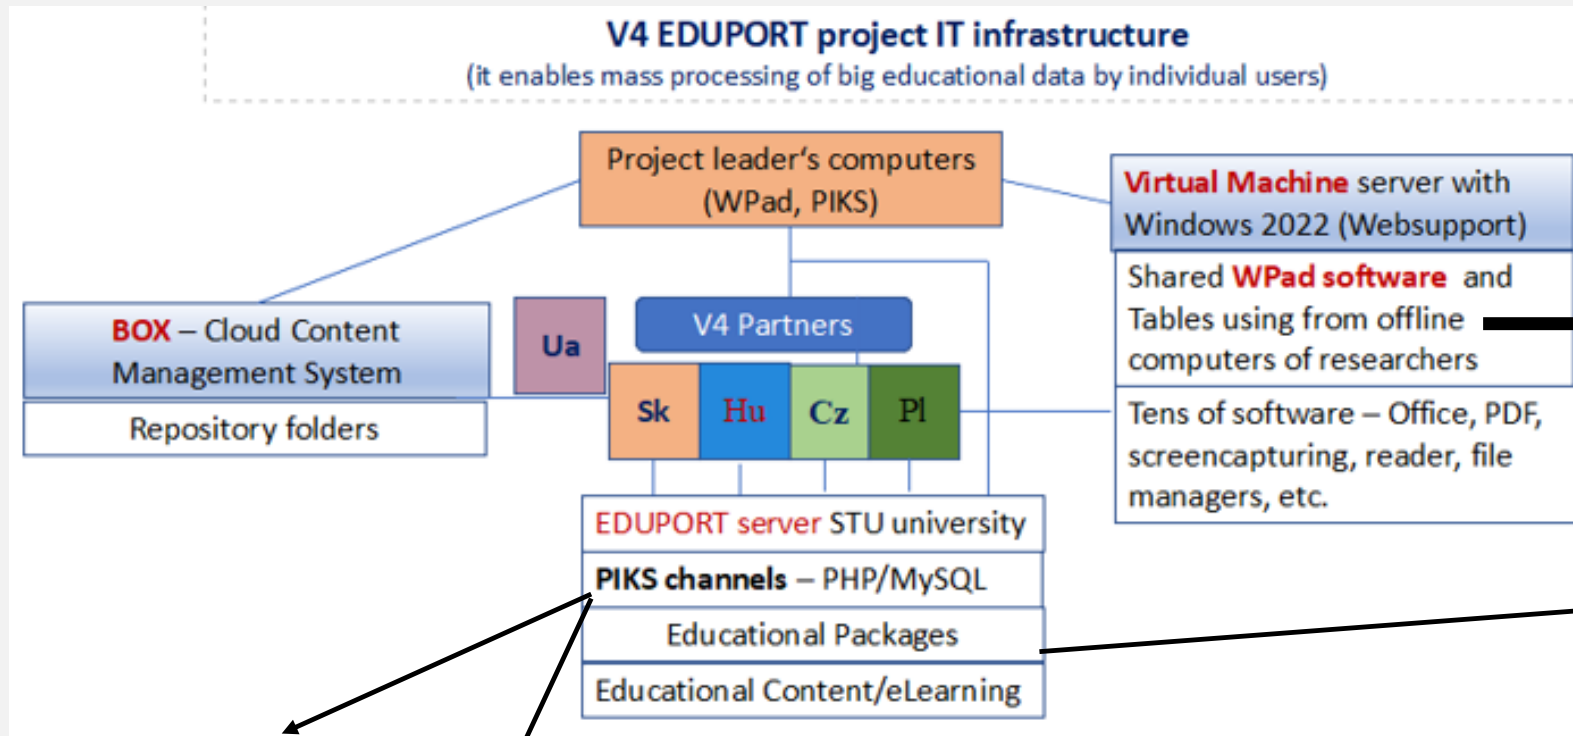

- Activities focused on creating the project's hybrid IT infrastructure and testing for e-Learning design (Virtual Machine, WPad, software) to obtain routine skills for production of educational-packages
- International outputs - publishing and presentations of V4 EDUPORT project activities on six conferences and international workshops (Varazdin, OER UNESCO)
- Creating pilot e-Learning design for blocks EDU-TUTOR, EDU-PACKS and EDU-IT (see presentations) - see e.g.: https://eduport.stuba.sk/EN/qladaj2_Workshop.php
- Multilingual Modelling of V4+ languages outputs joined with English Language
- Modelling V4+ Library from a set of science papers published by all partners

EDUPORT.tp
Project Title: V4 Educational Academic Portal for integrating IT into education
7/2022 -12/2023
Focus: Education and Capacity Building and Improving hard and soft skills for the 21st century through formal and non-formal educational methods
Short description of the project
The academic consortium will use the outputs from the V4+ strategic project to build a regional educational portal. We will jointly develop educational content to support distance learning and self-study. The project is divided into three blocks: EDU-Tutor, EDU-Packages and EDU-IT. The first two focus on the production of general educational materials for undergraduates and the production of specific content covering the joint expertise of the partners. EDU-IT addresses development of IT tools for content creation and content delivery including an application.

The screenshot shows the V4 EDUPORT PLE Personal Information Communication System interface. It includes a sidebar with navigation links and a main content area with filters and a list of links.

WPad all-in-one

Desktop Software Application for Windows and Virtual Machine (Windows 2022 Server) :: Personal Educational Software :: E-Learning Design :: Knowledge Repository

A computer science student's opinion on WPad (C++/2020)

If I were to highlight the advantages of WPad, it is clear integration, by which I mean that everything is in one place. All notes from exercises, lectures, source codes and the like, all in one place. It is also a pretty good basic HTML editor, so you could write and explain how to write basic html code and generate a page right away. Nowadays, the problem is that there is too much information, students have materials scattered everywhere, and WPad is very good at this, that everything needed is in one place.

Ak by som mal vyzdvihnúť výhody Wpad tak je to jednoznačné integrácia, tým myslím to, že všetko je na jednom mieste. Všetky poznámky z cvičení, prednášok, zdrojové kódy a podobne, všetko na jednom mieste. Taktiež je to aj obstojne dobrý taký základný HTML editor, čiže sa tam dal napísať a vysvetliť ako sa píše základný html kód a hneď si aj vygenerovať stránku. V dnešnej dobe je problém, že je až príliš veľa informácií, študenti majú materiály kade tade porozhadzované a v tomto je Wpad veľmi dobrý, že všetko potrebné je na jednom mieste.
